

ACCESSORIES

Gate Sensor

Safety bracelet*

Ref : DSP10-1H

Waterproof and wireless, this very efficient gate sensor enables to secure the different accesses to the pool (door of a veranda, gates, fence ..).

The gate sensor releases a pre alarm that warns the user of a potential danger and thus enables him to react instantaneously.

The battery will last from 3 to 5 years depending on the use of the device.

Ref : DSP10-1W

This safety bracelet * is placed around the child's wrist. So light and ergonomic that your child will forget about it. Once locked only an adult could take it off.

In case of a fall into the water, the bracelet will transmit a radio frequency signal to the central unit within less than a second and the alarm will go off.

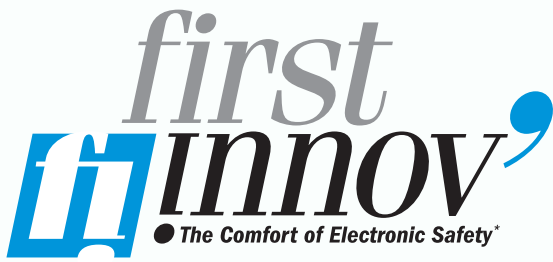

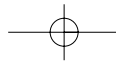

Its efficiency is permanent because the bracelet will protect your child even when the central unit is disarmed while swimming.

The sensor bracelet is compatible with all the Fistinnov's range of alarm systems.

MAIN TECHNICAL CHARACTERISTICS	
Warranty	1 year
Autonomy of the battery	3 to 5 years
Range	30 m

MAIN TECHNICAL CHARACTERISTICS	
Warranty	1 year
Autonomy of the battery	2 years
Range	30 m

*Bracelet incompatible with salted water.

ACCESSORIES

Ref : DSP20-1R

Enables to arm, to temporary disarm or to test the operation state of the system.
The deactivation function of the system is secure so that only an adult could disarm the alarm.

MAIN TECHNICAL CHARACTERISTICS	
Warranty	1 year
Autonomy of the battery	3 to 5 years
Range	30 m

Ref : DSP40-1R1

It enables to turn on or temporary turn off, or shut down the system for the winter season (only if the swimming pool is equipped with another standardized safety device).

MAIN TECHNICAL CHARACTERISTICS	
Warranty	2 years
Autonomy of the battery	3 to 5 years
Range	30 m

Ref : DSP20-3K

The warning, security and failure signals must always be heard. This siren can ensure that you hear the alarm by taking into account the location of your home compared to the location of the pool.

MAIN TECHNICAL CHARACTERISTICS	
Warranty	2 years
Autonomy of the battery	2 years
Range	50 m
